PROFILE

I am a student at RV University, currently pursuing a B.Tech course in Computer Science and Engineering. I have a keen interest in data analysis and management, and I am proficient in C, HTML, CSS, JavaScript, and a few other coding languages. I have 2+ years of experience in coding, and I have worked on various projects for my school assignments and for my friends. In my spare time, I enjoy dancing, investing, and reading books. I am always eager to learn new skills and explore new challenges.

EDUCATIONAL HISTORY

Pre-University @RVPU

Bangalore

Jan 2021 — Jun 2023

Here are some of the key skills typically learned:

Time Management: This involves setting priorities, creating a schedule, and breaking tasks down into smaller, manageable chunks.

Research Skills: From finding relevant sources to critically analyzing them to synthesizing information, research skills are important.

Writing Skills: This includes writing concisely, critically, and with an academic tone, as well as organizing information into a logical and coherent structure.

Critical Thinking Skills: It involves questioning assumptions, evaluating evidence, and drawing conclusions based on evidence.

Communication Skills: This involves expressing oneself clearly and concisely in both verbal and written formats, active listening, and collaboration with others.

Study Skills: These are the strategies and methods that aid learning and understanding

HIGH SCHOOL @SCASE

Bangalore

Jan 2008 — Dec 2020

Realizing Potential: School helps us identify our strengths and weaknesses. It exposes us to various subjects, helping us discover what we're good at and where we might need improvement.

Preparation for the Future: School provides us with the knowledge and skills needed for our future careers. It opens our minds to various possibilities for life after school.

Problem-Solving Skills: School equips us with the ability to deal with issues as they arise. It provides plenty of opportunities for us to practice problem-solving.

Learning How to Learn: School teaches us how to learn by providing a structured environment. We are introduced to new concepts and ideas, and then given opportunities to practice and apply what we have learned.

Social and Emotional Development: School ensures the development of our social, emotional, cultural, and physical skills.

Networking: School allows us to meet new people and form networks that can become part of our professional network in the future
